MARRIAGE.
On the 1st January, in London, Dr. H. BART J. W. BAKER, elder son of the late John BAKER, Esq., Com. Gen. to H. M. Forces, to AMY ELIZABETH SCOTT, daughter of the late THOMAS SCOTT, of Singapore.

DEATH.
On the 21st January, at Ipoh, Perak, JOHN HENRY, son of JAMES and DORA CRAWFORD, aged 1 year and 8 days.

The Daily Press.
HONGKONG OFFICE: 14, DE WILSON ROAD.
LONDON OFFICE: 121, FLEET STREET, E.C.
HONGKONG, 6th February, 1903.

The question of a universal language for the whole of the human race is one which has engaged the attention of a great number of theorists during the past, and many are the obvious advantages which they have been able to demonstrate would follow from the adoption of such a language by the world in general. They have even gone so far as to invent several such languages, and one of them, designated by its inventor "Volapuk," threatened at one time to gain many adherents. Yet, though it has a journal in the United States of America, and is still supported to a certain extent in Europe, it has entirely failed to commend itself to business men—and it is, after all, by business men that the idea of an universal vehicle of conversation is chiefly needed. In the meantime there has practically come to be one business language for the world. Needless to say, this is English. It was recently pointed out that in the time of Queen ELIZABETH there were not so many English-speaking people in the world as there are now in London alone. Moreover, in the countries where there is still room for a great expansion of population, America, Australasia, and Africa, the language of the population is already fixed. In China the growth of a jargon which has at least more resemblance to English than to any other tongue is steady. It seems almost as if the question of the necessary language of international communication is settled without the need of an agreement between the peoples of the

world. This consummation has been effected in the first place by the colonising and conquering tendencies of the English race and secondly by the attractive and assimilative qualities of the United States of America. England began by spreading her language all over the world, the United States are finishing by bringing the emigrants of all nations to America, there to learn English in its most recent developments. So much is this so that no case can now be made out for any other existing language. It was once possible, no doubt, to hold that French had equal if not superior claims, but in spite (or perhaps because) of its superior subtlety, French has now no chance, and is rather losing ground than holding its own. German has not, as a language, the merits of French, and for all Germany's great growth of population her inhabitants find it increasingly necessary to learn other tongues. The Latin languages other than French have the defect of not belonging to a people increasing in worldly power. Russian can be dismissed at once, as practically unknown to the rest of the world. There is in fact no European competitor which can stand against the English tongue; and no one will seriously suggest any Oriental language. The choice of an universal means of communication narrows itself down therefore to one between English and such as Volapuk, which must at best be a monstrosity.

It cannot, however, be denied that there are very grave objections to English, and they will suggest themselves readily to all who have thought or read anything on the subject. The difficulty of learning has perhaps been exaggerated. Continental Europeans, it may be granted, find it difficult to speak English without a very distinctive accent. But does not an average German, for instance, speak French with a German accent as much, say, as an average Frenchman English with a French accent? The grammar is in many ways simpler than that of other European tongues. The real stumbling-block in the spelling, and the genuineness of this obstacle cannot be denied. As one of the principal requisites of an universal language is that it should be as a means of literary communication, practical men cannot minimise the drawbacks of the chaotic character of English spelling. The Americans have, with their usual vigour, attacked this problem and introduced numberless "reforms," some of which are phonetically sound, while others are the reverse. But the effect of this has been to make the confusion worse, for while the popular British Press has to a large extent followed the United States, many Americans on the other hand have not approved of the changes. A recent magazine writer advocated the formation of an Anglo-American academy to adjust the differences which have arisen. Unfortunately, even supposing that such an academy could persuade Englishmen generally to write "labor" instead of "labour" or Americans to write "traveller" instead of "traveler," the gain would be small. How could the academy in question assimilate in any way the modes of speech, say, of the Board schoolmaster and the Maulla journalist? The literary languages of England and the United States, it may be said, are not thus divergent, and though there is a tendency to diverge, an academy is just what would check this. But would the language brook a restraint which has never been put upon it before? The literary language might, but the language of business is not literary, and it is, as we have said, as a means of business communication that an universal language is chiefly desired. Though there seems to be no alternative to the English or Anglo-American language as the universal practical language, there are many obstacles still to its general adoption.

The Russian cruiser *Askold* left for Nagasaki yesterday morning, and H.M. cruiser *Argonaut* arrived from Mirs Bay and the French gunboat *Surprise* from Haiphong.

The ninth, tenth, and eleventh cases of plague in the Colony this year were reported during the day ending at noon yesterday, all the victims being Chinese. One body was found dead in the street in No. 8 District.

A meeting of the Hongkong Boat Club will be held to-night at six o'clock in the Cricket Pavilion to discuss the question of amalgamating with the Royal Hongkong Yacht Club and building a club-house on a new site.

The annual tea and meeting of the Hongkong Temperance Union was held on Wednesday evening, at the S. and S. Home, Arsenal Street. That it was such a success is greatly due to the generous donations by various ladies of the Colony, to whom hearty thanks are expressed.

A meeting of the general committee of the S. George's Ball was held on Wednesday, when a supplementary balance-sheet for the Ball of 1897 was presented for approval, as also the accounts of the last Ball held in January of this year. The subscriptions exceeded the expenditure by \$240, and the reserve fund therefore now stands at \$801. A vote of thanks to the president, the hon. treasurer and hon. secretary was unanimously voted.

The banks are closing at 11.45 a.m. each day of the races next week.

It is hoped to get up a match between Hills and Plains on the Cricket Ground on Saturday.

The return polo match between Hongkong and Kowloon takes place at Causeway Bay to-morrow.

In the Hockey Shield match yesterday the 14th Bombay L.I. beat the Hongkong Hockey Club First XI.

Cholera in the Philippines is evidently steadily working its way down south, for it has now reached Zamboanga and Jolo (Sulu). As a consequence all vessels arriving in Sandakan from the Philippines are subject to at least five days quarantine.

The Brough Co., on its way up to Hongkong, will give one performance at Singapore on the 9th inst., the play chosen being *Are you a Mason?* the comedy which Hongkong is looking forward to on the 17th inst.

Dr. Durham, who was one of the members of the Commission sent out from London to study beri-beri in Christmas Island some time ago, states that when he last heard from the island the number of cases had decreased more than 80 per cent. Beri-beri has almost disappeared from Kuala Lumpur goal. This, says the *Singapore Free Press*, is very satisfactory in view of the serious state of affairs that prevailed there a short time ago.

By kind permission of Major Roddick and the Officers, the band of the 33rd Borneo Infantry will play the following selection of music in the King Edward Hotel to-night during dinner from 7.30 to 9.30:—
March..... "Marche Romaine,"..... Gounod
Overture..... "The Sapphire Necklace,"..... Sullivan
Selection..... "Three Little Maids,"..... Schubert
Song..... "Beloved, it is dawn,"..... Florence Arlwood
Selection..... "The Day Parisienne,"..... Ivan Caryll
Valse Lente..... "Dance des Fleurs,"..... Berger

We are informed that at the next general meeting of shareholders in the Club Lusitano, Ltd., which is to take place on the 9th inst. to pass accounts and elect a new committee, auditors, and balloting committee, the majority of these shareholders who signed the protest against the action of the directors in expelling Mr. Romano will not be present at the meeting, as they do not wish to participate in the election. We understand that these are the largest and most influential shareholders in the Club Lusitano.

The followers of Zoroaster, says the *Indian Daily News*, have cause to be grateful to Major Percy Sykes, British Consul at Kerman, in Persia, who has set on foot a movement from which great things may come. There are two main branches of the ancient Fire Worshipers, the Indian and the Persian. While the former is distinguished more than almost any other Asiatic community for enterprise, malice, attention to education, freedom from social prejudices, and good citizenship generally, the Zoroastrians resident in Persia remain much as they were when the Persian emigration to Bombay first began. Yet they are the same race, the same faith, and the same physical and intellectual endowment. Major Sykes has some warrant, therefore, for conceiving that if the Indian branch cultivated closer personal relations with the unlightened racial stock in Persia, the influence and example of the reformatory might gradually raise the degenerates to an equal footing, political, commercial, and industrial.

The Sandakan correspondent of the *Singapore Free Press* writes:—The Norddeutscher Lloyd are very active presently in these waters. It would appear that the Singapore-Borneo steamers have not been paying too well, and attempts are now to be made to remedy this. Of the two regular steamers on this run, one will go on from Sandakan to Lahad Datu, and the other to Tawau. The first-named run, Lahad Datu, has been definitely decided upon, but the Tawau trip does not seem to be quite so certain, at time of writing. The reason for this is that the N.D.L. want the Chinese to guarantee them a freight of \$900 a trip, but the Chinese will make no contracts, as the local boats, belonging to the Sabah Co., run down there often, and lead themselves more to the convenience of traders. We hear the Sabah Co. has only just declared a 7½ per cent. dividend, the first for eighteen months; that would not appear to show that there was very much in the local trade here, certainly not enough to pay the N.D.L. to run on to Darvel Bay regularly.

Asked to say what were the "books of his childhood," Mr. George Bernard Shaw, the versatile author, journalist, critic, and Borough Councillor, wrote:—I have no more recollection of my first book than of my first meal. I cannot recollect any time when I could not and did not read everything that came in my way. The two literary sensations of my childhood were undoubtedly the *Pilgrim's Progress* and the *Arabian Nights*. This shows that I was as good a critic in my infancy as I am now, though I could not then give such clever reasons for my opinion. I seem to have been born with a knowledge of the *Ancient Mariner* and *John Gilpin*. Also with an unaccountable recollection of Baron Trenck and his escapes from prison. I had to be encouraged by my mother to persevere at *Robinson Crusoe* until he reached the desert island, after which he carried me with him undisturbed. I acquired a very boyish (not childish) taste for Shakespeare from the snippets printed beneath Solow's illustrations. Children's books, from the accursed *Swiss Family Robinson* onwards, I always loathed and despised for their dishonesty, their hypocrisy, and their damnable dullness. My moral sense, like my literary taste, was sound.

"*Are longa vita brevitat*," remarks a Southern contemporary. Why not *are longitude*, we wonder?

Mr. Hugh Clifford, C.M.G., is bringing out a new novel entitled *A Free Lance of To-day*. The book will be published by Messrs. Methuen this month.

The condition of affairs in Leyte, P.I., is summed up in the following headlines in a Manila paper:—Leyte suffers itself to be again tranquillized. Nine savages however turn up to be killed and one hundred more surrendered. Cholera quarantine reported cause of trouble.

In 1893 the gradual abolition of slavery in British North Borneo was provided for by proclamation. That enactment having done its work, another proclamation was notified on the 31st December last, declaring that no form of domestic slavery will in future be recognised in that Territory, all attempts to revive any form of slavery being dealt with under the Penal Code.

One Manila paper writes of another thus:— "Our evening contemporary is to be congratulated on having such an enterprising and well informed Washington correspondent as — His pertinent and interesting articles almost alone for the involved verbosity that appears in the editorial columns of the paper that is honored by receiving — his correspondence."

The American barque *Mathilde*, which arrived at Singapore from the Philippines on Friday, was a long way out of her course. She was on her way from Mindanao to Manila, and had got as far as Corregidor—the entrance to Manila Bay—and in fact was being towed in by a small tug, when the North-east monsoon began to blow strong, and proved too much for tug and vessel. Accordingly, after a vain effort to make Saigon, the barque blew to Singapore, about 1,500 miles further away from her port of destination than she was two weeks previously.

ROYAL HONGKONG YACHT CLUB.
The 8th Club race will be sailed on Sunday next over Course No. 7. The 9th Club Race will be sailed on Sunday, 15th February, over course No. 3.

POLLARD'S LILLIPUTIAN COMPANY.
The *Belle of New York* was repeated last night by Pollard's Lilliputians at the Theatre Royal before another full house. The play ran even more smoothly than on the first night, and Miss Daphne Pollard was again the chief attraction in this excellent combination of talent. The Company will appear again to-night in the same place, and to-morrow *Paul Jones* will occupy the boards. The first matinee of the season will also take place to-morrow, the performance starting at 3.30.

MAY MEMORIAL PRIZE.
Police-Sergeant Walter Kent has been successful in winning this year the May Memorial Prize of £25. Last year he was a close second to Police-Sergeant J. J. Watt, who carried off the award and ex-celled in Chinese, a language in which Sergeant Kent was not quite so proficient. The prize, it may be mentioned, was presented for annual competition by the Hon. F. H. May as an incentive to useful study in ordinances, languages, and police work generally on the part of members of the Force below the rank of inspector. Sergeant Kent, besides perfecting his Chinese, also passed in Hindustani. The winner of the prize has choice between the £25 and a gold watch of equivalent value, and, following Sergeant Watt's example, Sergeant Kent, who is leaving for home on a holiday in a few weeks, has selected the watch.

FOOTBALL.
A match between H.M.S. *Pique* and H.M.S. *Ocean* was played at Happy Valley yesterday in the second round of the Hongkong Football Shield competition. There was a large crowd of spectators. As regards the physique of the respective teams there could be no two opinions, the "*Ocean*" being much the taller and speedier-looking lot as a whole. In the first half the *Ocean* representatives were almost continuously in their opponents' territory. They pressed hard and managed to secure one goal in spite of a stubborn defence, while the *Pique* failed to score. The second half was hardly contested and each side scored once, the game thus ending in a win for the *Ocean* by two goals to one. But for the excellent form shown by the *Pique* goalkeeper, the score against his side would doubtless have been larger.

The V.R.C. play the 78th Co. R.G.A. to-morrow, the 7th inst., at 4 p.m., in the first round of the Shield Competition, on the Hongkong Football Club Ground. The following will play for the V.R.C.:—
Goal, Fitzcock; backs, R. Lapeley (capt.), G. Duncan; halves, J. Craik, J. Whitehill, and R. Henderson; forwards, H. A. Solh, A. Humphreys, E. B. Harton, H. S. Holmes, and H. N. Sayer.

LATEST STEAMER MOVEMENTS.
The M.M. steamer *Annam*, with the next French mail, will leave Saigon to-day, at 5 p.m., for this port.
The C.E.R. steamer *Empress of China*, from Hongkong and usual ports of call, arrived at Vancouver at 11 p.m. on the 3rd inst.
The S.K. steamer *Albatross* arrived at New York on the 4th inst.
The N.D.L. steamer *Danubius*, from Hamburg, left Singapore for this port on the 4th inst., a.m., and may be expected here on the 10th inst.
The P. & A. steamer *Indrapura* arrived at Yokohama on the 5th inst., a.m., and may be expected here on the 18th inst.

"DAILY PRESS" SERVICE.

VENEZUELA.

[FROM OUR SPECIAL CORRESPONDENT.]

LONDON, 4th February, 5.40 p.m.

HOPEFUL RUMOUR.

Mr. Bowen's alleged offer that Venezuela shall pay immediately whatever amount the Allies are willing to accept as a preliminary to arbitration by the Hague Court is generally regarded as distinctly improving the situation.

GENERAL NEWS.

[FROM OUR SPECIAL CORRESPONDENT.]

LONDON, 4th February, 5.40 p.m.

THE NEAR EAST—TROUBLE IMMINENT.

Seven Bulgarian bands, six thousand strong, are preparing to operate in Macedonia this spring. The continued delay in the production of the Austro-Russian reform scheme is causing considerable uneasiness in Sofia. The *Times* fears serious trouble in the Balkans.

REUTERS'S SERVICE.

LONDON, 5th February.

DEATH OF EX-COMMANDANT PRINSLOE.

The ex-Boer Commandant Prinsloe is dead. Sir Michael Herbert has presented a counter proposal to Mr. Bowen from the allies, providing that two-thirds of the 30 per cent. of Customs dues at La Guaira and Puerto Cabello be handed to the allies and the remaining one-third to the other claimant nations.

LONDON, 3rd February.

INDISPOSITION OF THE KING.

The King is indisposed with a mild attack of influenza, and has been obliged to cancel all engagements for the week.

VENEZUELA.

Mr. Bowen has rejected the counter proposal of the allies and suggested reference to the Hague tribunal. President Castro, profiting by the prevailing feeling in America, is endeavouring to play off the latter against the allies, and apparently something resembling haggling is going on.

IRISH M.P.'S RELEASE FROM GOAL.
Messrs. W. Redmond, Roddy, and Roche have been released from goal with a considerable proportion of their sentences unexpired.

PRESENTATION OF RED CROSS.

At Government House yesterday afternoon H.E. the Governor, Sir Henry A. Blake, G.C.M.G., presented the Red Cross to Mrs. Crowle, this order having been awarded to that lady for her services in tending the naval and military wounded at Tientsin during the troubles in the North. There was a good attendance of naval and military officers to witness the ceremony.

HIS EXCELLENCY, in making the presentation, said:—Mrs. Crowle, I have asked for your presence to-day that I may have the great pleasure of handing to you the decoration richly earned by you during the most trying experiences of the siege of Tientsin in 1900. Finding yourself in the settlement, you volunteered your services in the most beneficent of all duties, the alleviation of suffering. After the return of Admiral Sir Edward Seymour's expedition you took entire nursing charge under Dr. Macnamara of H.M.S. *Endymion*, of a hospital with 57 sick and wounded men, and for four weeks you worked alone, day and night, not only the ordinary duty of nursing, but also doing yourself the necessary cooking. While others less capable were living in cellars, and the enemy's shells were being rained upon the town, the hospital itself being partially destroyed by shell-fire, you gave evidence of the highest qualities of our race, courage, devotion, and constancy. This was splendid service, and, sad as the memory must be to you of the brave men whose dying moments were soothed by your tender care, yet that memory must retain also the elements of comfort and sweetness in the consciousness of the self-imposed duty of mercy fearlessly and gallantly performed. To-day are assembled here the representatives of every rank in the sister services, who fought and suffered side by side in that trying time, and in whose name I thank you for all your loving kindness to their brothers in arms in sorrow and suffering, to which such ample testimony has been borne by Captain Bayley of the *Aurora*, Doctor Macnamara, and others. In recognition of your valuable service the King has conferred upon you the decoration of the Royal Red Cross, and no distinction has ever been more gallantly earned. I esteem it a high honour to be the medium of conveying to you this Royal Red Cross as evidence of His Majesty's appreciation of your good work. I congratulate you upon receiving it, and in the name of all present I heartily wish you many happy years in which to wear it. (Applause.)

Mrs. Crowle bowed her thanks, and the proceedings terminated.

HONGKONG SANITARY BOARD.

A meeting of the Board was held yesterday in the Board Room. Present:—Dr. J. M. Atkinson, Principal Civil Medical Officer (President); Hon. Dr. F. W. Clark, Medical Officer of Health; Hon. W. Chatham, Director of Public Works; Mr. F. J. Bodeley, Captain Superintendent of Police; Mr. E. Osborne, Mr. C. McI. Messer, Acting Registrar-General; Mr. Lau Chu Pak; and Mr. G. A. Woolcock (secretary).

SANITARY SURVEYOR'S REPORT.

The annual report of Mr. J. Bryan, sanitary surveyor, was laid on the table. The report showed that during the year 1902 plans had been deposited and passed for the drainage of 432 houses, and out of 1,453 such plans in hand during the year, 713 were carried forward to 1903. Of notices for repairs or additions to drainage arrangements 535 out of a total of 619 had been completed, leaving 84 to be carried forward. The drains and sanitary fittings of 63 buildings had been tested and reported on, and 22,678 houses visited by the drainage inspector and overseer, with the result that 2,026 drainage nuisances were discovered. The drainage inspector had also cleaned 3,362 choked drain-traps on private property. During the year certificates had been granted for 893 new houses and 1 addition—an excess of 102 over the number issued last year. The work of laying out the new plague cemetery at Cheung Sha Wan was proceeded with, and the majority of bodies dead of plague during the year had been buried there. In Caroline Hill Cemetery 10 new terraces were formed. The report was adopted, on the motion of the President, seconded by the Hon. W. CHATHAM.

THE BRIDGES OF HOUSES.

An application was considered from Messrs. Denison, Ram and Gibbs, architects, engineers, and surveyors, for exemption from reducing the bridges of six houses on Inland Lot No. 578 to a width of 3 feet 6 inches, on the grounds that (1) the alteration would involve a change in the positions of the doors at each end of the bridges, and (2) that the encroachment beyond the prescribed width of 5 inches was so small as not materially to affect the distribution of air.

On the motion of the President, seconded by Mr. BADELEY, exemption was granted.

A SIMILAR APPLICATION.

With reference to the bridges in the backyards of three houses on Haughon Inland Lots Nos. 195, 196, and 197, where it was stipulated by the Board, in recommending exemption from providing the open spaces required by the Ordinance, that the bridges should be reduced from 3 feet 4 inches to 2 feet wide, Messrs. Leigh & Orange, civil engineers and architects, stated in a letter to the Board that the width of the bridges in question had been reduced to 3 feet, and requested that, as they were built of concrete and iron and could not be further reduced, permission be granted for this width instead of the 2 feet originally granted.

Hon. Dr. CLARK explained the conditions under which exemption from providing open spaces was granted, and Mr. OSBORNE moved that the architects be asked to furnish an explanation as to why these conditions had not been complied with.

Hon. W. CHATHAM seconded, and the motion was agreed to.

MORTALITY STATISTICS.

During the week ended 10th January the death-rate in the Colony was 183 per 1,000 per annum, against 26.2 in the previous week and 17.1 during the corresponding period last year.

LIMEWASHING RETURN.
During the fortnight ended 31st January 390 houses out of a total of 2,005 in the Eastern district were limewashed.

RATS CAUGHT.

From 5th January to 2nd February 15,267 rats were caught in Victoria and Kowloon, and of this number 120 were infected.

RATS AND PLAGUE.

The President moved that the Board obtain authority to insert in the local papers advertisements reminding house-owners that rat-traps and bird-lime could be obtained from the Secretary on application. It was highly desirable at this season of the year to destroy as many rats as possible and to fill up the rat-runs with concrete. From the rat return it was evident that the percentage of infected rats had increased, and it was worthy of note that this should have occurred now seeing that six cases of plague had been reported within the past two days. The President thought it was not generally known that rat-traps could be got free of cost by applying to the Sanitary Board, and it was well that public attention should be drawn to the fact.

Hon. Dr. CLARK seconded the motion, which was carried.

MARKET STALL WANTED.

The Board went into committee to consider an application from Mr. G. W. Gegg, manager of the Horse Repository, Causeway Bay, for a stall in the Central Market for the supply and sale of milk.

The letter embodying the application was addressed to Mr. C. McI. Messer, Acting Registrar-General, who, in passing it to the Secretary of the Board, intimated that he did not recommend the granting of the application on the ground that there was no room in the market. Mr. E. OSBORNE intimated:—"Turn out, the tinned provision dealers. A milkman has much more right to be in the market than they."

After a short discussion as to the present distribution of the stalls in the Central Market, during which the idea was mooted of transferring the meat-stalls to the Praya and an accommodating fruit-sellers at the Queen's Road entrance, for the convenience of Europeans as well as making less public the unloading of freshly-killed meat, the President moved that these persons keeping stalls for the sale of tinned provisions be given six months' notice.

and that some of these shall be utilized for the sale of fresh fruit and vegetables.

Mr. Messer seconded, and the motion was carried.

The PRESIDENT.—It is necessary to consider this application for a stall for the sale of milk?

Hon. W. CHATHAM moved that it be refused.

Mr. Messer seconded.

Mr. OSBORNE.—Can they sell the milk outside?

Hon. Dr. CLARK.—Yes.

Mr. Messer.—It is only a matter of paying higher rent.

The motion was carried.

FUMIGATION OF HOUSES.

Correspondence was laid on the table relative to the fumigation of the basements, etc., of a house in Kennedy Road and Macdonnell Road. This included letters from the occupants, some of whom were willing and others unwilling that the proposed fumigation should be carried out.

This was all the public business.

SUPREME COURT.

Thursday, 5th February.

IN ADMIRALTY JURISDICTION.

BEFORE HIS HONOUR SIR WILLIAM M. GOODMAN (CHIEF JUSTICE) AND CME. EDWARD B. KIDDLE, R.M.S.

"ALBION" (ASSES-OR).

CHU LEUNG "S.S. HOI HO."

This was an action for damages arising out of the collision of the s.s. *Hoi Ho* with the stern-wheel passenger junk *Wo Li* which took place in the Canton River on the 7th March last and resulted in the sinking of the *Wo Li* with great loss of life.

Mr. E. H. Sharp, K.C. (instructed by Mr. Paget Hett of Messrs. Mcnulty & Brutton, solicitors), appeared for the plaintiff, and Mr. M. W. Slade, barrister-at-law (instructed by Mr. C. E. H. Davis of Messrs. Wilkinson & Grist, solicitors), was for the defendant.

In reply to a question by his Lordship, Mr. Sharp said that the plaintiff's junk was a boat propelled by a stern-wheel by coxswains clinging to a pole with their hands and working the cranks of the wheel with their feet; sails were also used on the boat.

The petition stated that about daybreak on 7th March, 1902, the junk *Wo Li*, of which the plaintiff, Chu Leung, alias Chu Kwong, alias Chu Sing, was then part and is now sole surviving owner, whilst on a voyage from Sai Nam to Canton laden with a general cargo, and having on board about 110 passengers, was in the 'Tai Mei' branch of the Canton River, near Sany Island. The wind at that time was light, the weather was fine and clear and the tide was ebbing with a force of about two miles an hour. The junk was heading in about a N.W. direction and was making about two miles an hour over the ground. A white masthead light and a white light on each side of the stern were exhibited and burning brightly and a good lookout was being kept on board of her. At that time those on board the junk observed the masthead light and the two sidelights of a steamship, which proved to be the *Hoi Ho*, on the starboard quarter of the junk at the distance of about one or one and a half miles. The junk kept her course and speed, the *Hoi Ho* in the meantime overtaking her. When the *Hoi Ho* was about 100 yards away from the junk those on board her saw there was a danger of collision and shouted out. The *Hoi Ho* though loudly hailed came on and struck the junk on the starboard side of her stern and did her so much damage that she immediately filled with water and with her cargo wholly lost; and three of the owners, eight of her crew and about 50 passengers were drowned. The plaintiff alleged that there was no proper lookout kept on board the *Hoi Ho*; that the *Hoi Ho*, though an overtaking ship, neglected to keep out of the way of the junk; that the *Hoi Ho* neglected to slacken her speed or stop or reverse or to do so in due time; and that the collision and the damages and losses consequent thereon were occasioned by the negligent and improper navigation of those on board the *Hoi Ho*. He claimed damages and costs, an account to be taken of the damage with the assistance of merchants.

The defendant in his answer to the petition stated that the British ship *Hoi Ho* was owned by Chua Woon and was of 601 tons gross register, carrying a crew of 30 all told, and at the time of the collision was on a voyage from Hongkong to Canton. At a little before 5.20 a.m. of the 7th March the *Hoi Ho* was in Canton River off Sany Island about N. of the 'Tai Mei' light and on that side of the channel which lay to her starboard. The wind was N.E. and light. The weather was overcast, but clear and at that time it was very dark. The tide was ebbing from two to three miles an hour. The *Hoi Ho* was heading about N.W., making about four knots an hour over the ground with her regulation lights duly exhibited and burning and a good lookout was being kept on board her. In these circumstances a vessel which proved to be the Chinese stern-wheel passenger boat *Wo Li* was observed at a distance of about 200 feet away on the port bow of the *Hoi Ho* without lights of any kind exhibited on her, whereupon the engines of the *Hoi Ho* were immediately stopped and then reversed full speed astern. Her whistle was blown and those on board shouted out to the *Wo Li* to keep on the port side of the *Hoi Ho*. The *Wo Li* did not keep on the port side of the *Hoi Ho* but endeavored to cross the bows of the *Hoi Ho*, and her starboard quarter came into collision with the stern of the *Hoi Ho*, whereupon the *Wo Li* heeled over, filled and capsized, many of her passengers and crew being saved by the *Hoi Ho*. The defendant alleged that the *Wo Li* did not carry or exhibit any lights, did not keep a proper lookout and did not

keep on her course and speed; that she improperly endeavored to cross the bows of the *Hoi Ho*; that the collision was caused by the negligence and improper navigation of those on board the *Wo Li* and was not caused or contributed to by any of those on board the *Hoi Ho*.

Mr. Sharp stated that there were special regulations in connection with the navigation of the Canton River which might be applicable here, but he thought the regulations which concerned the case were those involving the universal principles of seamanship.

Mr. Slade said the special regulations did not, in his opinion, apply, but agreed that the case was covered by the broad principles of seamanship.

Evidence was then led, and was continued until a late hour in the afternoon.

The Court adjourned till to-day.

POLICE COURT.

Thursday, 5th February.

REPORT MR. F. A. HAZELARD (POLICE MAGISTRATE).

PEUDO-POLICEMEN.

Li Kin, carpenter, and Ng Fat, of no occupation, were taking a walk in Samsui on a day or two ago, when they espied a gambling "school" operating in a lane. A bright idea struck the two friends—"Gambling is illegal, therefore why should not we masquerade as policemen and see what profit we can make out of the business?" So they trekked for the group, the carpenter with a police truncheon, which he had by some means become possessed of, in his hand. Arrived at the spot, they ordered the gamblers to stop, and thumped vigorously on the kerosene tin whereon the cards were being placed to enforce their commands. Then, it was alleged, the carpenter took a ring off one man's finger whilst his confederate appropriated all the money staking on the game. There was some doubt on this point, however, and it was not pressed against them when they appeared in Court. Suffice it to say that the gamblers entertained doubts as to the bona-fides of the two, and arrested them.

His Worship convicted them of assuming the name of officers of the police force, and fined each \$40 or six weeks. They went to prison.

BEFORE MR. J. H. KEMP (ACTING POLICE MAGISTRATE).

WITHOUT A LICENCE.

Wong Iu Fung and Tsau Cheung Tsau, sheriff and manager respectively of A. & S. Watson's branch shop at 373, Queen's Road Central, were charged with selling and permitting to be sold intoxicating liquors without an appropriate licence. Mr. J. S. Harston, solicitor, appeared for the defendants, who pleaded not guilty and were remanded till Thursday, 12th inst., at 2.15 p.m. on bail of \$150 each.

RAILWAYS IN THE SUDAN.

Under the direction of Lord Cromer and the Sudan, plans are being matured for the further opening up of the Sudan by means of railways. As officially announced, the first object will be to connect Khartoum with the Red Sea at Suakin. Irrigation is the great need of Egypt; railways are what the Sudan wants.

The shortest route to connect the Nile and Red Seas by Berber to Suakin along the ancient caravan route. This route is being surveyed, but is not likely to be chosen. The country between Berber and Suakin is largely arid desert, practically uninhabited, and presents serious engineering difficulties. Lord Cromer is understood to favour a line from Khartoum to Kassala, and thence North to Suakin. This line would follow established trade routes, would traverse fertile country, and would form an important link in the railway to Uganda and Mombasa. The completion of the Uganda line would mark a long step forward in the realization of the Cape to Cairo scheme, but its usefulness would be in no way dependent upon the finishing of Mr. Rhodes's project. The surveys ordered by Lord Cromer are expected to be completed this year, and a start made with the extension from Khartoum.

By Article V. of the New Treaty with Ethiopia, the Emperor Menelik grants the British and Sudan Governments the right to construct a railway through Abyssinian territory to connect the Sudan with Uganda. It is not, however, intended that the railway shall climb the Ethiopian table land, but as by the Treaty in question England has acknowledged as part of Abyssinia a considerable area stretching Westward almost to Nasser on the Sobat, the railway, to avoid the Nile swamps, will have to cross the newly-acquired territory of the Negus. The object of the concession to Menelik was to give him commercial access to the White Nile through some of its navigable affluents. The railway, when built, will therefore be of benefit to both nations.

Although there has been nothing in the nature of a survey for railway purposes, yet, owing to the work of Major H. E. Austin and others, the country the railway will cross is fairly well known. The line the railway will take has been already decided in outline. From Kassala it will run South to Gedaref, and thence to Roseires, on the Blue Nile. The cost of the construction of this section will be borne by the Sudan Government. From Roseires the railway, skirting the Abyssinian escarpment, will go South to Itang, on the Baro River. The Baro is an affluent of the Sobat. Itang is an Abyssinian settlement at the foot of the hills, and in its neighbourhood the Negus has promised to grant to the Sudan Government for commercial purposes a small enclave.

From Itang the line will be carried to Lake Rudolf, from the Southern extremity of which to the nearest point of the existing Mombasa-Victoria Nyanza Railway is about one hundred miles. The scheme is a bold one, but perfectly practicable, and there is no doubt that the plan here outlined will be carried to completion.

REVIEW.

Two On Their Travels. By ETHEL COLQUHOUN. London, William Heinemann.

Books by female globe-trotters are generally as vague and unreliable as those perpetrated by the male of the species—only more so; but this one is an exception. The author has observed as well as seen, and is sometimes amusing—even when she tries to be so, as she does too often. Many of her jokes are made at the expense of her "only husband" Andrew, who was, in this respect, her unfortunate fellow-traveler. Mrs. Colquhoun says in her preface that she is "unaccustomed to writing books." Why did she break so good a custom, for the coast parts of the Straits Settlements, of Borneo, of the Philippine Islands, and of Japan, which are the scenes of her travels, have often been described? More is to be learned that is fresh from her experiences on the Trans-Siberian railway. The author says in the same apologetic preface that the book is "not very well written and not at all well drawn." She means us to disagree with this, and we do, especially as the book is not long drawn out but as crisp and as short as the present unfortunately cheap-rate of paper and printing will allow. A book being "drawn" is scarcely English, but the expression refers to the many drawings in the work which were done by the lady herself. These are better than the letterpress which they well illustrate.

Mrs. Colquhoun graphically describes the state of the servant question in the Far East. "Andrew (like so many we know) began to expand as soon as he got out to the East, and, from being the mildest-mannered man that ever quitted before a 'lost-cause' young lady, became the imperious autocrat all over, and the Orientals liked and served him the better for it." We doubt this last assertion. "Getting information is Andrew's favourite occupation, and he has a real genius for it." Andrew has endowed his wife with this information as well as with the "worldly goods" that enabled her to travel, and now she is kind enough to pass it on to those who have worldly goods enough to buy her book, which, however, is not expensive.

WAS NAPOLEON EVER A BOY?

"The more I read of him, and the more closely I study his character, the more strongly I feel that in many ways he never was a thoughtless boy, or knew the pleasures of being young. His earliest portraits strengthen me in this conviction." Thus writes Viscount Wolsey in the *Pall Mall Magazine* on Napoleon Bonaparte's early years.

"His shoulders (in 1796) were still narrow and sloping; he was small in stature, with short legs and generally insignificant in appearance. His complexion was of a pale olive colour; his head was large and massive, and his extreme thinness caused this to look still bigger. His countenance was grumpy, and of a careworn expression. He had remarkably piercing eyes of greyish blue, and a big, well-formed nose. Long straight locks of very dark and much oiled chestnut hair hung upon his shoulders, after the unkempt fashion of the Republic. Care seemed already to have marked him for her own—the result probably of the misery of his school days and of the abject poverty he subsequently endured when a subaltern in the army. But at the same time it must have been a face that would in any country have attracted attention from the impress it bore of ability and deep thought. His eyes seemed rather to search the thoughts and opinions of those he conversed with, than to reflect what was passing through his own brain. He was a great play-actor throughout the whole of his eventful life, and if he could not always divine what was passing in the minds of those he conversed with, he generally contrived, by a well-studied manner and the intense and searching gaze he turned upon them, to make them believe he did so."

Not the least interesting portion of Viscount Wolsey's article is that in which he attributes Napoleon's greatness to patient plodding—"No soldier ever applied himself more to the science of war than he did. He devoted himself to history, as from it he learned the best and the greatest military lessons, and by a careful analysis of the campaigns of great commanders he was able to formulate precepts for his own guidance. To write about him at all is attractive; and in describing his commanding genius, even the most sober-minded of historians have been carried away not only by the absorbing greatness of their subject, but also by its alluring witchery. He is often described as a 'heaven-born leader,' but I confess to a disbelief in that species of man. Those who have had most experience in war, none more strongly than Napoleon, have left it on record that he who would command successfully should prepare himself for that duty by deep study. He himself—war's greatest master—wrote that the ambitious soldier should read and re-read the campaigns of the world's most renowned generals. Napoleon may have been a heaven-born leader, but it is certain also that he was a great student of military science and of military history."

"In recounting the names of the generals whose campaigns he recommended all officers to read, he left out that of Marlborough. Had he wished to recount the names of the great luminaries by which this world is lit, he might equally well have ignored the sun. It is easy to understand why he should—for personal reasons—omit the name of a renowned Wellington; but that he should ignore that of Marlborough can only be accounted for by his hatred of the nation which gave him his downfall, and which wrecked all his hopes for ever. We know that he was fully conversant with Marlborough's wars. Indeed, one of the works he took with him to St. Helena was Core's life of that great Englishman. This book Napoleon in St. Helena presented to the officers of the Lancashire Fusiliers, and it is still preserved in their mess. Further, it is a curious fact that the only able and even readable work upon Marlborough's campaign was written by the express order of Napoleon when he was at the great camp he had established near Boulogne, to threaten England with invasion."

WIRELESS TELEGRAPHY.

I had the misfortune, or perhaps good fortune, writes the Halifax, N.S., correspondent of the *Times* on the 10th December, to be storm-stayed at Sydney, Cape Breton, for three days last week when attempting to reach Newfoundland at a particularly inclement season. The enforced delay gave me an opportunity to visit Mr. Marconi at Glace Bay, 16 miles from Sydney, the point where he is applying his final tests to the system by which he hopes to revolutionise communication around the world. The interest everywhere taken in his enterprise justifies some attempt at describing what there is to be seen at the station, where, with the assistance of the Canadian Government, the inventor is apparently working forward steadily towards the great end he has in view. The coast of Cape Breton at Glace Bay is not distinguished, as one might perhaps have expected of the place selected for such a purpose, by any marked elevation. The actual site of the station is a light promontory, not more than 70 ft. above the sea level. Here, at the angles of a square, the side of which is about seventy yards, four towers have been built up to a height of 215 ft. These towers are constructed of wood-work trellis, strengthened by bands of steel and strongly buoyed on all sides in beds of concrete. Wood is chiefly used, because structures of steel alone would absorb and absorb electric energy which ought to pass into the ether. The main purpose of the towers is to support a number of wires suspended in the air. About fifty of these pass up from the operating room to a cross wire stretched between two of the towers. This multiplication of wires is meant to secure a more powerful accumulation of electric energy, and upon this depends the distance to which the message can be propelled. The electric current is generated by alternators worked by a steam engine. The tension is increased by the use of transformers. The discharge of the accumulated current produces in the ether the electric waves which make the recording impression on the instruments at the receiving station. So far the external appliances of the station seem exceedingly simple. The machinery within the operating room only a technical expert could describe, even if it were right to do so. The lay observer has, however, ample proof of the great strength of the current used in the lightning flash which accompanies each movement of the operator's hand and in the sharp and continued concussion that follows, only to be compared to the rapid firing of a Maxim gun.

There has been criticism of the delay which has taken place in getting the appliances for transmission ready for work. But when one sees these appliances and considers the conditions under which they are being installed, the surprise is rather that so much has already been done. The instruments for sending messages, and those for receiving them, which have to be adjusted and attuned, are more than 2,000 miles apart. It has been necessary to provide an electric current of a higher potential than has ever been used before. Glace Bay is at the very extremity of Canada, remote from the centres of electrical manufacture, and therefore communication with these is slow. Every change or adaptation of appliance is, therefore, carried out under exceptional difficulties. Now that the necessary structures have been completed, a staff of five or six electricians and engineers is sufficient to carry on the tests. But their work is severe. Sixteen hours a day has been a common allowance of working time during the past month, and, as several of these hours are given to night work, the strain has been constant and trying. Nothing seems too severe, however, to the energetic group of young scientists whom Mr. Marconi has selected as his colleagues. Their confidence in their chief and in the ultimate issue of their work seemed complete; the disciplined skill with which they carried out the operations appeared to an outsider altogether admirable. The *Carlo Alberto*, in which, by the courtesy of the Italian Government, Mr. Marconi carried on his experiments last summer around the coasts of Europe, and, later, in crossing the Atlantic, still lies in Sydney Harbour, in spite of the cold weather, which must be trying to sailors accustomed chiefly to the Mediterranean. The *Marquis Solari* remains at the Canadian station representing the Italian Government, which has throughout shown the deepest and most practical interest in the development of the inventor's plans.

My opinion is not that of an expert; it may, perhaps, be better stated as an impression, and must be taken for what it is worth. But I came away from Glace Bay with the feeling that Mr. Marconi's modest confidence in his work will in the end be justified by results. Meanwhile, patience may still be necessary. The whole history of great inventions in the past proves how unreasonable is the demand of those who ask for proofs of final success at once. It may well be that the inventor has been himself too optimistic on this point. Partial success may be achieved almost immediately, but weeks, months, even years, may be required to bring the system to complete efficiency. At present the transmitting installation is most perfect at Glace Bay, where Mr. Marconi has spent the last few months. Poltha is more fully equipped for receiving messages. Before the system can be in full use for return messages this inequality must be remedied, and that will take time. Meanwhile, the possibility of sending clearly understood signals over the whole distance has, I believe, been fully established. It now remains to work out the methods by which this signalling may be made accurate and reliable at all times. There is no reason for disappointment if this process should be gradual; if energy and confident determination can attain the end more speedily an observer who has been allowed to watch the operations may at least vouch that these qualities are abundantly present at Glace Bay.

OUR NAVAL WANTS.

In an article specially written for the January number of the *Navy League Journal*, Admiral the Hon. Sir E. R. Fremantle, G.C.B., C.M.G., deals in detail with "Naval Wants." Sir Edmund approves generally of the forward policy of the present Board of Admiralty, which, he says, is strenuously battling with the problems placed before them, and goes on to make a large number of suggestions for the improvement of the personnel of the navy. It is interesting to note that many of the changes urgently recommended by Admiral Fremantle have already been adopted in the memorandum issued a month ago by the Admiralty. We want more dockyards, he says, and it would be good policy to establish a new yard in the Humber, or elsewhere in the North Sea, and equip it with up-to-date machinery. In a former article Admiral Fremantle urged a great increase in the number of ships, and this he now renounces, asking for 3 more battleships and 137 cruisers, as well as auxiliary repair, distilling, coaling, and ammunition vessels. He condemns as extravagant the present system of keeping so many first-class ships in commission, and so few in reserve, and the same argument is adduced regarding the men, Sir Edmund holding that we have too many active service ratings of all classes and too few reserves, and if the present extravagant system continues the numbers will have to be increased by 25,000 in the next three years, to man all our ships. Sir Edmund pleads for a consistent naval policy, whatever party is in power, and for more direct responsibility. After quoting Weihaiwei as an instance of Admiralty vacillation, Sir Edmund concludes as follows:—"Naval efficiency must mainly depend on the Admiralty, which is the head of the service, as the officers and men, ships, and dockyards are its limbs; but even to deal shortly with Admiralty reform and organisation would need at least a complete article, so I will only direct attention to one or two points. I agree with Lord Charles Bessborough that we want more direct responsibility, and I have never been able to see why the heads of departments cannot make their independent official reports, as is done in democratic America. This no doubt is an important point, but it pales in importance before the necessity for a consistent and patriotic policy. Under our system of party Government, it is true, political and financial considerations must somewhat interfere with the intentions of even a patriotic and far-seeing Admiralty, but what I plead for as the bed-rock of naval efficiency is that whatever party is in power, and whatever the funds allotted to the naval service, we should keep the same goal in view, and follow a steady course."

"Let me give one or two recent instances of our aberrations. Weihaiwei is a crucial example of inconsistency. When we took over Weihaiwei, it was decided to make it a secondary naval base, and Mr. Goschen's Admiralty approved of its being fortified, but Lord Salisbury's Admiralty decided that this was unnecessary, after some 90 per cent. of the defences had been completed. Let us compare this with German methods. When they took possession of Kiaochau I know that it would prove an expensive luxury if it was to be developed as a base of any value. Apparently they had counted the cost, for last year they spent over £500,000 on their new acquisition. Contrast this with our sudden unwillingness to spend £250,000 or £300,000 on Weihaiwei. Again, with regard to mercantile cruisers, in 1900-1901 we voted £35,000, for these necessary auxiliaries, the following year the vote was reduced to £25,000, to be again raised to the former amount this year, and next year, with the subsidy to Cunard, it will again be largely increased. These two instances should be enough, but I might refer to Admiralty inconsistency in naval education, which has been tinkered at and altered from time to time at short intervals ever since I joined the navy 33 years ago."

"What is the remedy? Clearly naval policy requires to be more consistently thought out, and followed to its logical conclusions. In Mr.

Arnold Forster's memorable words, there "is necessity for reinforcement of the intellectual equipment of the Admiralty." Strategically we require a War Lord, as Lord Charles Bessborough has pointed out, who should be the head of a large and really influential Intelligence Department, whose aims and objects should be published as far as is politically advisable. It is true that we have at present a hard-working, zealous Intelligence Department, presided over by able officers, but no one knows what advice, if any, Rear-Admiral Custance or Prince Louis of Battenberg have given or may give, and for all we know the First Lord may have acted in direct opposition to the views passed before him. Similarly, as regards naval education or Admiralty boards as they are called, the result of the enquiry of competent officials, and their views when approved should be published and consistently carried out, subject only to alterations in detail, for a series of years.

In conclusion, if I were asked what is the most urgent need of the navy, I should reply, "A consistent naval policy, systematically carried out, with more direct responsibility of departmental officials, whether Admiralty heads of department or naval officers." Without this all the efforts of the best of First Lords and Admiralty boards are as hay and stubble, liable to be burnt up by the first breath of criticism, and efficiency becomes a Tantalus-like dream."

AN ALARMING WATERSPOUT.

The following interesting narrative of a recent waterspout in Sandakan Bay and its disastrous results within the precincts of the Saw Mills is given by the *British North Borneo Herald* of the 3rd inst.:—"During a heavy downpour of rain at 4.30 p.m. on December 16th, a small waterspout suddenly appeared out of the mist approaching from a south-easterly direction. The column of water, which was about ten feet at the foot of the spout, struck the No. A. J. *Seruton*. The forward cabins bore the brunt, but, owing to their superior structure, sustained no injury, except a broken window. The bridge-awning, stanchions, and bulwarks, caught up in the whirlwind, were scattered in several directions, the canvas awning, screens and weather-cloth being awisted like rope round the mast. A life-buoy and two or three hand-mills were carried over to the saw-mill wharf, a distance of nearly 200 yards. One side-light was thrown to the stern of the vessel and the other dropped about 5 feet ahead of her. The whirlwind passed within a few feet of the *Buleh* lying alongside the mill wharf, and in so doing apparently swept some heavy planks from the quay into the water."

EDITION.

THE FRENCH IN TONKIN
AND SOUTH CHINA.

By ALFRED CUNNINGHAM. Sixty Illustrations
and One Map. Price 8s.

ON SALE AT LOCAL BOOKSELLERS.

PRESS NOTICES.
"This volume places before the English
reader the best description of the Southern
French colonies in the Far East that has yet
appeared."—"SHANGHAI MERCURY."
"Many of us in the Far East have read
books on Tonkin, ancient and modern, but a
knowledge of them as they are there to-day,
of what has been accomplished under M.
Duncker's administration is far from common."
The author has written what he set
out to do, a very readable and accurate sketch
of the colony as it is at present. "—ALLOTHER,
this is a book to read."—"BANGKOK TIMES."

THE BOOK WILL BE FOUND TO BE A COMPLETE
GUIDE TO THE HANOI EXPOSITION.

Hongkong, 17th October, 1902. [2776]

CHESS NOTFS.

By X.Y.Z.

The sealed handicap tournament at the
Hongkong Chess Club commenced with
fourteen competitors, two of whom have since
withdrawn. As the retiring of players involves
a revision of the handicap, it is to be hoped that
all entered will make an effort to play out their
games.

At the annual general meeting of the Singa-
pore Chess Club, Mr. J. B. Elcum was unani-
mously re-elected president; and the following
were appointed to the committee:—Messrs.
Banks, L. M. Corveiro (secretary), P. A.
Rentas, W. Craig, D. McL. Croik (treasurer),
and F. C. Wroford.

There seems considerable doubt as to what
masters will compete in the Monte Carlo
tournament. Home papers say that the start
of the tournament has been postponed until the
9th inst. at Lasker's request, to allow him to
reach Monte Carlo from America. Pillsbury is
a certain entry, but the other Americans are
doubtful, while Maroczy and Janowski are
improbable starters. Janowski is not popular
at Monte Carlo, for the reason that at the last
tournament there, when Mason, who wished to
leave ahead of time and had two games un-
played, requested to have the round, in which
he was pitted against Janowski, scheduled first,
without the formality of the customary drawing
—the other game being with Eisenberg, this
was the only one that affected the prize winners,
and for that reason the favour was granted—
Janowski protested against having the drawing
waived, and had feeling resulted.

The following interesting end-game study is
the latest production of the clever Bohemian
composer, Herr O. Duras—White: King, on
Q Kt 8; Rook, on K R 2; Bishop, on K B 3;
Pawn, on Kt 6 and on Q Kt 7 (five pieces).
Black: King, on Q 2; Rook, on K 7; Pawn, on
K Kt 7 (three pieces). White to play, and win.
The following game arose out of the Hong-
kong-Singapore cable match. Up to Black's
thirteenth move it is the same as the Allgaier
Gambit won by Singapore. The game, which
was conducted by correspondence from that
point, was, like the cable game, won by the
attack.

White. Black.
1 P-K4 P-K4 13 Kt-B3 B-Kt5
2 P-K4 P-K4 14 Q-Q3 Kt-B3

11 Castles P-Kt5 23 P-Ktch Kt-P
12 P-K4 Kt-KB3 24 Q-N-K Resigns

In the cable game Hongkong played 13.
P-K4, and it was with a view of trying the
variation in the text that the above game
was played. Black, however, comes to grief
even more speedily. His game was desperate
at move 20 when he gave back the gambit
piece, and he could have resigned then or at
move 23. K-B sq. was no better than
K-B2 for White then continues 23
P-K6, Q-Kt; 24 B-Q6 (ch). Mr. J. B.
Elcum, who conducted White, gave no chances,
and demonstrated what a strong player can do
with the Allgaier Gambit.

Dr. Lasker has been giving the Falkbeer
Counter Gambit a searching test while on tour
in the United States. We give below (with
notes from the Westchester Gazette) a game
played at St. Louis between Lasker and two
allies and Max Judd and two others, Lasker's
side playing White—

White. Black.
1 P-K4 P-K4 15 P-B3 B-Q sq
2 P-K4 P-Q4 16 R-Q sq K-B sq
3 Kt-KB3 Q-P4 7 K-B sq Kt-B3
4 Kt-P B-Q4 17 Q-Kt B-Kt5
5 P-Q4 Kt-KB3 18 R-Q2 R-K sq
6 B-B4 Castles 21 P-B5 Bt-Kt
7 Castles P-B4 21 Rt-B4 Q-K4
8 Kt-QB3 Kt-B3 22 Q-Kt5 P-K4
9 B-K3 Q-K3 23 P-Kt3 P-K3
10 Kt-K5 P-P 24 B-Q7 R-K2
11 Kt-Kt Pt-Kt 25 Bt-R Q-Kt
12 Kt-P Kt-K5 26 Q-Qch Kt-Q
13 Bt-R Q-Q4 27 Pt-B Resigns

With 3 Kt to K B 3 White adopts a sound
continuation, avoiding the complications of the
Gambit, which must be taken as a compliment
to their opponents. Black might have returned
the compliment with 5... P-P, P-P, which
simplifies matters much more, and leaves an
open diagonal for the K B. or Q-K on eventually
and avoids complications in the centre. Black
tries with 7... P to B 4 to loosen the centre,
but it is a defective manoeuvre, and leaves them
with the inferior position. So complications
increase, as any exchanges in the centre later
on would involve the loss of the advanced K P,
and they can never disentangle themselves from
the coils which White—who play under the
leadership of Dr. Lasker with consummate skill
—tightens with every move. The pretty 20
P to B 5, cutting off the retreat of Black's
Bishop, made any further resistance useless.

Painkiller
(FERRY DAVIS)
the seaman's friend, for cholera,
cramps or chills. It acts like magic.
Take no substitute.

PANDING ALLOY.

Treatment by Röntgen rays is proving of
importance in cancer of the skin. Reporting 4
recent cases, Dr. Gilchrist mentioned having
seen in Manchester 34 cases that had been
completely cured, while Finson has reported 45
cured cases. The application usually lasts 15
minutes, though it may extend to 30 minutes.
The malignant cells seem to be specially caught
out by the rays, but burns may occur, and for
preventing them a special glass tube—opaque
except at the ends—has been devised. The
effects vary greatly with the idiosyncracies of
the patients.

In a late interesting account of spider life,
Dr. Dollinger described their ruthless destruc-
tion by the ichneumon fly and by certain wasps.
The young of some wasps can live only on live
spiders, and the mother wasp, therefore, ren-
ders the spiders powerless by her sting—after
which they can live a month—and then deposits
them in the cocoon where she has placed her
egg. On hatching out, the wasp grub feeds
on the bodies of the living spiders. Another
wasp deposits her egg in the body of the spider,
which is then buried alive, and is fed upon by
the wasp grub.

A newly patented German process of giving
relief to ornaments and reliefs on wood consists
in glazing strips of paper over the parts to be
raised, and then dabbing the entire surface
vortically with bundles of fine steel wire. The
softer parts of the wood come out as dust,
while the protected places and hard annual
rings remain unaffected.

The aeroplane is the most promising solution
of the flight problem, in the opinion of Major
Baden-Powell. Models have flown, light weight
engines are now available, and a successful
machine awaits the liberal use of money.

The production of milk powder has been
perfected by Herr Ekenberg by means of an
apparatus called a continuous exsiccator. This
evaporates the milk to dryness without a
vacuum, at a temperature not exceeding 40 deg.
C. (104 F.), and odour and taste are so well pre-
served that it can be told whether the milk had
been pasteurized or boiled. Heating with water
at 61 deg. to 70 deg. C. converts the powder
into milk that is in every respect like the ordi-
nary product. Special treatment has overcome
the tendency of the stored powder to pass gra-
dually into an insoluble state, and has improved
its keeping qualities, giving it a high degree of
resistance to bacteria and mould as well as to
dampness and heat. The apparatus can dry
10,000 quarts daily, yielding about 1 pound of
powder from 5 quarts of milk.

The curious formations known as "snow
mushrooms" reach extraordinary development
near the Glacier House, in the mountains of
British Columbia. At this place the tree
trunks have the most favourable diameter, and the
stumps are always left several feet high, and the
snowfalls are usually damp, occurring at about
32 deg. F. Dr. Vaughan Cornish reports that
on his visit in February, 1901, when the snow
was five feet deep, he saw one stump 2 feet in
diameter with a cap 9 feet across and a broken
tree 4 feet through with a snowcap 12 feet across.
It is estimated that these snowcaps must often
weigh a ton, they are symmetrically rounded
and they are so solidly frozen as to be not
easily broken.

The first steps in decimal time-keeping, taken
in Switzerland, have met with the approval of
leading scientific bodies. M. Paul Dittschheim has
constructed a decimal chronometer called the
astrometer, and a new registering chronoscope,
the hours being counted—as recommended by
M. Henri de Sarraute—from 0 to 24, with
subdivisions into 100 minutes of 100 seconds,
each second consisting of two beats. In measure-
ments of the circle, the divisions are 240
degrees, each subdivided into 100 primes con-
taining 100 thirds.

The blue colour of the sky has been long
attributed to refraction of light by the dust,
or minute particles, scattered in the air. A
different theory has been worked out by
M. Spring, of Liege, who has made almost
all possible conditions, injecting them into
agitated solutions and into glass tubes filled
with such limpid solutions as chlorides of
aluminium. While he could get red, yellow,
violet, etc., no blue appeared until by
electricity he obtained a perfectly pure at-
mosphere. His conclusion is that the sky's
azure is purely electrical in origin, and an
essential quality of the air.

The simplified Foucault pendulum of M.
D'Aronval is a copper-covered leaden ball of
24 pounds supported by a steel wire about a
hundredth of an inch in diameter. The wire is
attached to the ceiling by a nail, and a metal
block screwed to the ceiling firmly clamps the
upper end of the wire, leaving the rest of it free
to swing about the lower face of the block.
Such a pendulum is capable of swinging about
three hours, making evident the earth's rotation
in that time.

The expansion of metals on heating is a
serious disadvantage for many purposes. The
new alloy of iron with 33 per cent. of nickel
is claimed to expand less than 1.12, 00, for an
increase of 1 deg. C. while the expansion of iron
is 1.80, 000 for deg. C. The alloy is recom-
mended for clock-pendulums, measures, etc.

The idea of Dr. Garrigue, of the Paris
Faculty of Medicine, is that tuberculosis, cancer,
and other germ diseases destroy because the
formates, which vivify the blood, are absorbed.
The cells die when formic acid can no longer

be produced. To cure he would invert the
process, supplying oxygen to the cells, and
producing oxygen by formic acid. Other
physicians call him a quack.

Acetylene Lamps for Fused Incandescence
have projected a fine light three times as far as
the naphtha lamp.
